Your Clients Are Searching For You

Solutions4Restaurants can help make sure they find you.

With millions of people using search engines and online directories every day to locate products and services, it is almost certain that someone is searching in your area for a restaurant, if not today, then certainly this week!

If you don't have an effective online presence your restaurant risks losing out on this large and growing market and **Solutions4Restaurants** has developed highly affordable solutions to help your restaurant be found online.

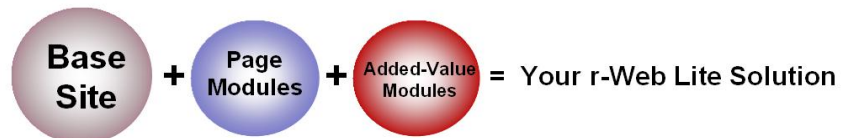

The r-Web Lite Concept

r-Web Lite is a low-cost yet high performance web marketing solution, designed for any restaurant looking to take their first step in promoting their business online.

The entry point is a Base site to which a range of modules can be added to create a powerful, interactive marketing solution.

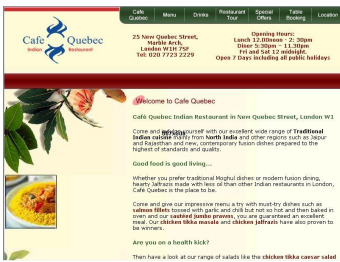

*Drive profits to your
business by marketing
online*

A website is a proven and highly cost-effective way of both winning new clients and providing existing clients with a better service. With prices starting from just 90p per day the marketing benefits offered by the internet are affordable for any restaurant.

r-Web Lite

The cost-effective web-marketing solution for restaurants

r-Web Lite has been designed to provide a low-cost, entry-level solution for a restaurant looking to launch their first website or improve an existing site.

This highly affordable, yet powerful, marketing solution, will allow a restaurant to increase revenues by promoting their business on the internet and winning more table bookings. The starting point is a professionally designed and supported base site, which can be developed over time through the addition of page and added-value modules.

Features and Options

Base Site

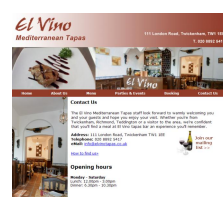

The base site consists of 3 pages. Some examples are shown below:

Home

Menu
